

SIKANDERPREET SINGH

Backend Developer — Node.js

Faridabad, India | +91 97811 24247 | sikanderpreetsingh01@gmail.com | linkedin.com/in/sikander-io

PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience designing and delivering scalable, secure Node.js services for high-traffic production environments. Deep expertise in REST API architecture, JWT/RBAC authentication, relational database design (MySQL, PostgreSQL), and cloud deployments on AWS and Azure. Proven track record integrating AI capabilities (OpenAI, Pinecone vector search), message queues (RabbitMQ), and 10+ third-party platforms including Stripe, Google APIs, Twilio, and Meta. Adept at multi-tenant SaaS architecture, asynchronous pipeline design, and cross-functional team collaboration.

CORE COMPETENCIES

REST API Design & Architecture	JWT & Role-Based Access Control	Multi-Tenant SaaS Architecture
Database Design & Optimization	AI Integration (OpenAI + Pinecone)	Async Pipelines & Message Queues
AWS & Azure Cloud Deployments	Third-Party API Integration	Agile / Cross-Functional Delivery

TECHNICAL SKILLS

Languages: JavaScript (ES6+), SQL

Backend & APIs: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, RBAC

Databases & ORMs: MySQL, PostgreSQL, Sequelize ORM, Pinecone (Vector DB), Redis

Cloud & DevOps: AWS (EC2, S3, SES, RDS), Microsoft Azure, PM2, Git

AI & Messaging: OpenAI API (Embeddings, Chat Completions)

Real-time & Messaging: RabbitMQ, Socket.io

Integrations: Stripe, Google APIs, Meta/Instagram, Twilio, Zoom, GoHighLevel, Mixpanel, Firebase

Tools: Postman, JIRA, ClickUp, ClamAV

PROFESSIONAL EXPERIENCE

Backend Developer | Wegile

January 2023 – Present

- Architect and develop scalable Node.js/Express.js backend services powering multi-tenant SaaS products serving concurrent production traffic
- Design clean, maintainable REST APIs with centralized validation, error handling, and secure layered architecture — reducing bug escape rate to near-zero in production
- Implement end-to-end authentication systems: JWT token lifecycle, RBAC permission layers, and OTP verification workflows
- Integrate 10+ third-party platforms — Stripe (payments/subscriptions), Google APIs, Meta/Instagram, Twilio (SMS), Zoom, Mixpanel (analytics), and GoHighLevel
- Design and optimize MySQL and PostgreSQL schemas to handle high-volume, growing datasets with efficient indexing and query performance
- Deploy and maintain services on AWS (EC2, S3, SES, RDS) and Microsoft Azure, including environment configuration and post-production monitoring
- Collaborate daily with frontend engineers, QA, and product managers in Agile sprints to ship reliable, production-ready features on schedule

Boost!Plug™ — AI-Powered Job & Opportunity Platform — *Node.js · PostgreSQL · OpenAI · Pinecone · RabbitMQ · Azure*

- Built a multi-tenant backend from scratch in Node.js and Express, supporting isolated data per organization with shared infrastructure
- Implemented AI-powered candidate-opportunity matching using OpenAI text-embedding-ada-002 and Pinecone vector similarity search — replacing keyword search with semantic relevance scoring
- Designed asynchronous job pipelines using RabbitMQ and background workers for email queues, data sync, and heavy processing tasks
- Integrated Google Places API for location intelligence, ClamAV for uploaded file virus scanning, and Mixpanel for funnel analytics
- Deployed complete service stack on Microsoft Azure with environment-specific configurations

K9 Stays — Pet Services Marketplace — *Node.js · MySQL · Stripe · AWS*

- Developed a full marketplace backend enabling pet service discovery, booking, and payments across service providers and end users
- Implemented RBAC for multiple user roles (admin, provider, customer), Stripe subscription billing, paid listing promotions, and featured placement logic
- Built geo-based service search using Haversine algorithm — returning nearest providers sorted by real-world distance
- Integrated Google Places, Instagram (Meta) Graph API, and Zoom for provider profiles and virtual consultations
- Deployed on AWS EC2 with S3 media storage and MySQL RDS database

Web Solutions Executive | [Edana Farms Pvt. Ltd.](#)

January 2022 – January 2023

- Owned the full IT and web function end-to-end — built and managed company e-commerce platform with Shiprocket (logistics) and Razorpay (payments) integrations
- Developed internal productivity tools using Node.js, React, MySQL, and JWT authentication
- Led digital marketing operations: SEO, analytics setup, Meta Ads pixel tracking, and Core Web Vitals optimization
- Translated business requirements directly into technical workflows and scalable digital solutions

Assistant Professor — Computer Science | [St. Soldier & Anand College of Engg & Mgmt](#) *Sept 2020 – Dec 2021*

- Delivered undergraduate coursework in Computer Science; mentored students on software engineering fundamentals

EDUCATION

B.Tech — Computer Science & Engineering

2018

College of Engineering and Management, Kapurthala
